

ColorFusion Décor

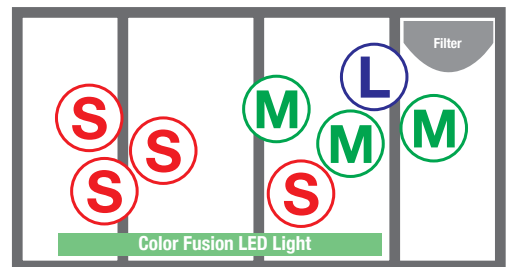

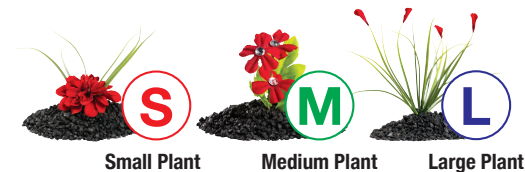

Example layout grids

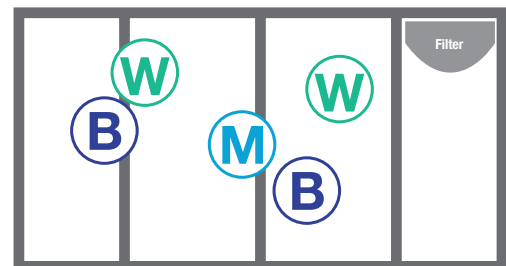

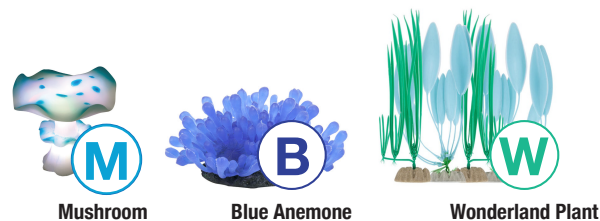

- 1 Use a variety of small, medium and large plants. Place small plants in front of medium plants—and large plants at the back or sides.

- 2 Arrange plants in odd numbers, such as 1s, 3s and 5s, for a more natural appearance.

- 3 Create a dramatic focal point using a single item, such as a white anemone or mushroom.

- 4 Create multiple areas of visual interest using fewer different components, and instead, repeating like items.
